Career Objective

Full-Stack & AI Engineer with 3+ years of experience building scalable AI-native applications using Next.js, React, TypeScript, Node.js, and Python. Specialized in **Agentic AI, RAG, and LLM-powered workflows** using LangChain and LangGraph, with experience in autonomous agents, tool calling, document intelligence, and real-time systems. Strong in backend architecture, databases, Docker, and CI/CD, with a focus on turning complex business problems into reliable AI products.

Work Experience

AI4LEX (Italy) Remote

SDE - 2 *March 2025 - Present*

- Built scalable full-stack applications (Next.js, React, TypeScript, Python) with real-time WebSocket features for live data sync.
- Designed Agentic AI workflows (LangChain, LangGraph) powering RAG pipelines, contract analysis, and MCP-style AI servers; deployed via Docker and CI/CD.

Muzigal (Hyderabad) Remote

Full Stack Developer *Dec 2023 - Feb 2025*

- Developed the UI and integrated backend APIs, architecting Node.js services for smooth front-end/back-end communication and a cohesive user experience.

Edgroom Pvt Ltd (Vishakapatnam) Remote

Full Stack Developer *May 2023 - Dec 2023*

- Built reusable React components and Next.js-routed pages, improving SEO and enabling dynamic content via client-side API integration.
- Collaborated on performance optimization, achieving a 30% boost through efficient component usage.

Projects

u2ube Frames – AI Video Studio for Explainers, Lessons & Tutorials *View Project*

- AI video studio with an agentic director that writes custom Remotion animations from scripts or ideas, with AI narration, generated illustrations, chat-based scene editing, and on-demand MP4 rendering.
  Stack: Next.js, React, TypeScript, Remotion, PostgreSQL, Cloudflare R2, Docker, FFmpeg.

SchedBee – Universal Multi-Tenant AI Scheduling & Business Operations Platform *View Project*

- Multi-tenant AI booking platform for local SMBs with a 4-mode scheduling engine and a WhatsApp AI agent with human handoff. *Stack: Next.js, Node.js/Express, LangChain, LangGraph, PostgreSQL, RabbitMQ, Docker.*

Leadership Experience

Backend Development Trainer *July 2022 - Dec 2022*

- Trained 18 college juniors on backend development (Node.js, MongoDB, Express) and conducted Git sessions to build awareness of version control and collaborative workflows.

Education

Rajiv Gandhi University of Knowledge & Technologies – Srikakulam, A.P *April 2023*

Computer Science / B.Tech ***CGPA: 8.0***

Organizations: TechSeminal, Placement-Cell Technical-Team

Skills & Interests

AI & Agentic Systems: LangChain, LangGraph, Agentic AI Architectures, RAG Pipelines, Chain-of-Thought Reasoning, Tool Calling, MCP-style Servers

Backend, APIs & Real-Time: Node.js, Express.js, Python, RESTful API Design, WebSockets, BullMQ, Event-driven Scheduling

Frontend & Mobile: React.js, Next.js, TypeScript, Tailwind CSS, ShadCN UI, React Native

Databases, DevOps & Infrastructure: SQL, Prisma, Drizzle, Docker, CI/CD, PM2, VPS & Cloud Deployments
